Vacant position :
Front-End Software Engineer
(ref. JO-216)

Are you a passionate engineer? Do you want to join a young and dynamic company with a self-organized and flexible environment, and where innovation and collaboration are key? If yes, this is an exciting opportunity for you.

exense GmbH is a software publisher and services company, specialized in Scalable Automation, Performance Engineering, Service Monitoring and Analytics. We are a human-size, bootstrapped startup operating in Switzerland, France and Germany. Our mission is to help companies operate their IT systems in a more efficient way through our in-house built innovative and high-quality products. As an open-core company, we are firm believers in the open-source philosophy, and we pride ourselves on being an open-minded workplace. We provide a dynamic and inclusive work environment that enables autonomy while offering a sense of belonging to a great community.

What is the job?
As a front-end software engineer, you will make direct contributions to our flagship automation product step (http://step.exense.ch) and will play a key role in the future of the platform. Responsibilities include:
- Take over leadership of the Web UI development of step and other critical products
- Implement complex visualizations
- Contribute to the UI and UX design
- Work hand in hand with backend software engineers
- Ensure quality, write and maintain E2E and Unit Tests
- Actively contribute to the development of the core UI framework used by step and other products
- Contribute to the consolidation and enhancement of the UI development process
- Support end-users and use the resulting knowledge to improve the products

What experience is required?
We're looking for someone with solid experience and demonstrated achievement in Front End Software Development, including:
- Web-Application frameworks (preferably Angular or Angular.js)
- HTML5, CSS3, Bootstrap, JSON, REST Web services
- E2E testing tools (Selenium, cypress, puppeteer or equivalent)
- Visualization libraries
- Javascript test frameworks
- Strong affinity for quality management, test automation, user experience and usability

What are we looking for?

exense

- **Autonomy -** You're not afraid of making judgements and decisions, and you're willing to take ownership of a product. Ideally, you've built something on your own that you'd like to show us.
- **Collaboration -** You're a sincere, curious and dedicated person. We build up team effectiveness through questioning, finding solutions together and supporting peers. You focus on adding value to projects and communicate well with those who work with or around you.
- **Creative thinking -** Your analytical thinking, your creativity and your willingness to solve issues will enable you to develop great designs and software solutions.
- **Communication -** You're able to communicate information with precision and clarity. You are fluent in English (written and spoken). German and/or French are a plus.

What are our perks?
- Human sized company where personal initiatives are rewarded and daily wins are celebrated
- Competitive Swiss salary and benefits
- Flexible and dynamic work environment - we respect our people to do their work how and when they work best
- Attractive location in the center of Zurich, a few walking minutes to the main train station

exense GmbH is an equal employer and values diversity, so all profiles will be considered without any discrimination.
